

## A Practical Guide to Persistent Pain Therapy

4<sup>th</sup> and 5<sup>th</sup> August 2018

### COURSE OUTLINE:-

This 2-day workshop is relevant to anyone who works with people in pain. It uses evidence-based educational methods to explore therapeutic neuroscience education from both clinical and educational perspectives. You will also learn how to apply these teaching skills within your practice setting in order to optimise your patient's learning experience. Patient education forms a significant component of modern healthcare, yet most clinicians have a limited toolkit. **To help people make sense of their pain, we must first learn to teach.**

### FEEDBACK

"This course will fundamentally change how I communicate with my patients." Doctor

"I connect with my patients so much better since taking this course." Physiotherapist

### Instructor:-

**Mike Stewart** MCSP SRP MSc PG Cert (Clin Ed)  
Mike is a physiotherapist and visiting university lecturer with twenty years of experience managing complex, persistent pain conditions. In addition, he is a dedicated practice-based educator committed to providing evidence-based education to a wide variety of health professionals. His Know Pain workshops have provided clinicians around the world with practical pain education skills. He has completed an MSc in Practice-based Education at The University of Brighton and is pursuing a PhD focusing on pain and communication. His published work has received international praise from the leading names in neuroscience.
